Digital black

Intuitive control screen for every home

It will certainly sound familiar: in a number of rooms at home there are various switches next to each other. 1 or more for the lights, 1 for the roll-down shutters, 1 for the sun blinds ... But which control button is which?

Or perhaps you are building a new home. Do you already know exactly which controls you want where? Will you choose switches? Or do you want to dim your lights? Are you opting for electronic roll-down shutters or sun blinds? Where should you place your thermostat? And are you sure that nothing has been forgotten?

Thanks to the Digital black, **comfort, convenience** and **flexibility** in home automation is achieved, without having to adapt your cables. Using an intuitive control screen the size of a switch, you can control up to 12 different devices or systems. And with your smartphone you can easily set which functions you wish to control, without needing to involve an installer.

Discover **Digital black**, the digital control screen that fits any electrical installation.

8 reasons to take home the Digital black

1

Control your lighting, heating, roll-down shutters, ventilation, music, Niko Home
Control atmospheres and more with just **1 screen**

2

Up to **12** controls or atmospheres

3

Digital control no larger than a **switch**

4

Simple to set using your **smartphone**, without involving an installer

5

intuitive control in **1 movement** thanks to the proximity sensor

6

High-quality control screen that adapts to the amount of light in the room

7

Sharp image quality with large viewing angle allows variable mounting height

8

For **every home**: fits any normal **flush-mounting box**

Intuitive design

Thanks to the Digital black you can combine the simplicity and easy operation of a normal switch with the flexibility of an adjustable control screen.

The Digital black is **the same size as a normal Niko switch**. It fits every flush-mounting box. This means it combines perfectly with the controls already in your home. Thanks to its **stylish and timeless design**, the Digital black **fits beautifully into your interior**, whatever the style of your home.

best of the best

Control whatever you like...

The Digital black is a **convenient** control screen with **clear symbols**. You can use it to control up to **12 different devices or systems**.

Controls

Light On/Off

Dimming lights

Heating

Ventilation

Garage door

Roll-down shutters

Venetian blinds

Sun blinds

Velux roof window

Reynaers sliding window

Music on your Sonos or Bose device

Atmospheres

Have you also programmed atmospheres into your Niko Home Control installation? You can switch them **on and off with just 1 button**.

Watching TV:
close your curtains
and dim the light

Going to bed:
your heating on the
night setting and all the
lights off

Arriving home:
lights on in the hall, living
room
and kitchen

Going on holiday:
presence simulation

Eating:
music and
the light above the
dinner table on

Party:
soft music and
the curtains
closed

Everything off:
your heating
lower,
all the lights off

... and change it whenever you fancy

You can set the Digital black exactly as you like it.

In the **Niko Home** app:

- Choose the control that should always appear on the screen.
- Select a 2x2 layout (grid view) or carousel of controls.
- Change the order of the controls.
- Choose how many controls you wish to see on 1 screen: 1, 2, 3 or 4.
- Add a new control.
- Delete a control.

The app can be downloaded for free in the App Store or Play Store.

Control in 1 movement

The Digital black **reacts to your movement**: when your hand approaches the screen it automatically goes on and calls up the first control. This is the control that you use most often: putting the light on or off, dimming the lights, raising or lowering the roll-down shutters, increasing the temperature... You can control the Digital black in 1 simple movement, without even looking.

Need a different control? Use your finger to swipe to the required control, or use the **fast navigation bar** at the bottom to go directly to the required control.

Do you notice after a while that you use the Digital black **more often for something** else? Simply use the app to set this control as the new standard. You can also move around other frequently-used controls, to bring them closer to your standard control . In this way, your screen can be set exactly as you like it.

Exceptional image quality

The high-quality control screen ensures optimal legibility whatever the conditions. Is the sun shining? Then the Digital black will shine extra bright, allowing you to comfortably find your atmosphere or control. When visiting the toilet in the night, the light level is much less, so that you are not blinded.

Thanks to the sharp image quality and the large viewing angle, you can choose for yourself at what height to install the Digital black, without losing image quality.

For every home

There's a Digital black for every type of electrical installation:

- Traditional electric cables: the Digital black **230 V** with built-in single switch
- Bus cabling: the Digital black **24 V**

Which Digital black your installer chooses depends on your electrical installation.

Digital black 24 V

For Niko Home Control installations

Are you already using Niko Home Control? Or are you planning to build, do a conversion or full renovation, lay bus cabling and install Niko Home Control? The Digital black **replaces any multiple switch**. You hang up the screen in a central location from which you wish to control your various devices and systems. For example, in your kitchen, living room, hall, office, bedroom or bathroom.

Digital black 230 V with built-in single switch

For standard electrical installations

Do you have an electrical installation with standard electrical cabling which you can't or don't wish to replace? The Digital black does just the same as the single switch you are replacing without any further intervention: putting the light on and off. It is also your first step towards home automation.

The second step: adding the cableless **smart hub** to your installation and replacing the controls you wish to operate with the Digital black with **connected controls**. Rest assured: there's absolutely **no** need to start **chiselling** or **drilling**.

This allows you to make your home or room much smarter. And you immediately have access to all the options in Niko Home Control for traditional cabling.

Want to find out more?

Ask your electrical installer for more information about the Digital black, about Niko Home Control for traditional cabling and Niko Home Control for bus cabling.
