

IP68 kit

320-00128

4 year warranty

The IP68 kit is the waterproof solution for all outdoor applications. The kit contains:

- a 20-105 W transformer, resin-cast (ref. 320-00104)
- a casting pot
- a sack of resin
- a convenient box with a holder for the casting pot
- a clearly written instruction manual in which the casting process is explained step-by-step

The kit contains a convenient box with an opening designed to perfectly fit the casting pot. This way you can secure the casting pot in the packaging while you pour in the resin. And thanks to the markings in this pot, you know exactly how much resin must be poured in. The transformer supplied has a large power output range. It can be used for all applications from 20 W to 105 W.

Technical data

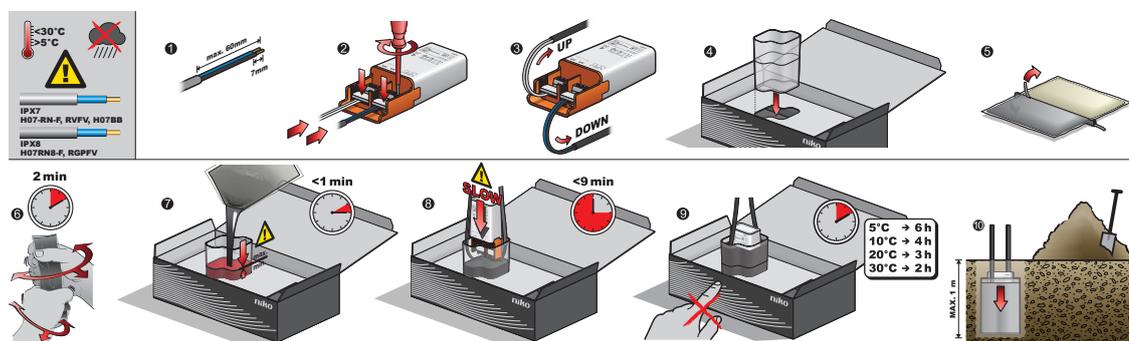

IP68 kit

The IP68 kit is the waterproof solution for all halogen applications. The kit contains consists of a convenient box with an opening designed to perfectly fit the casting pot. This way you can secure the casting pot in the packaging while you pour in the resin. And thanks to the markings in this pot, you know exactly how much resin must be poured in. The transformer supplied has a large power output range. It can be used for all applications from 20 W to 105 W.

- Marking: CE
