4 year warranty

This 1-channel outdoor motion detector, which is not activated by pets, is perfectly suitable for every light switch around the house. The detection range is 16 metres. The motion sensor can be precisely aimed. The device has a built-in light sensor and switches the lighting on automatically or manually with an N.O. push button (to be ordered separately). After the pre-set time delay, the light is switched off automatically. This sensor can be configured both manually and by remote control.

Finishing colour: black

- Animal detection can be switched on/off
- Low crossing detection
- Low consumption (0.25 W)
- Detection head adjustable horizontally and vertically
- Separate setting for the lux, the switch-off delay and the sensitivity
- Can be programmed manually or using the optional remote control
- High-performing detection with few inadvertent triggers

Motion detector for use in driveways, carports, gardens, etc.

- The lighting remains on while there is motion
- You can split the detection zone using the cover mask provided.
- The user remote control provided allows you to turn animal detection on and off and turn the lights on and off manually.
- Potential-free contact
