

Motion detector M46HC, DALI-2, secondary - BMS, 18-53 m, IP54, for high ceilings, for surface mounting, white

4 year warranty

This high ceiling detector is a DALI-2 secondary and BMS detector that extends the detection range of a DALI master detector or as part of a BMS system. It is designed for surface mounting and has an IP54 protection degree. If the detector is used as a secondary detector and connected to a DALI bus controlled by a DALI master detector, it will start communicating with this master detector without further commissioning. If it is connected to the DALI bus of a BMS system, the detector needs to be commissioned with the BMS software. The detector's settings can be modified using the Niko detector tool app and 2-way Bluetooth® communication between a smartphone and the detector or using the BMS software.

Finishing colour: white
