

DALI relay module

350-70980

4 year
warranty

Via this module an extra contact can be controlled together with the DALI detector. The relay module must always be connected to a DALI bus that is controlled by a Niko DALI master presence detector.

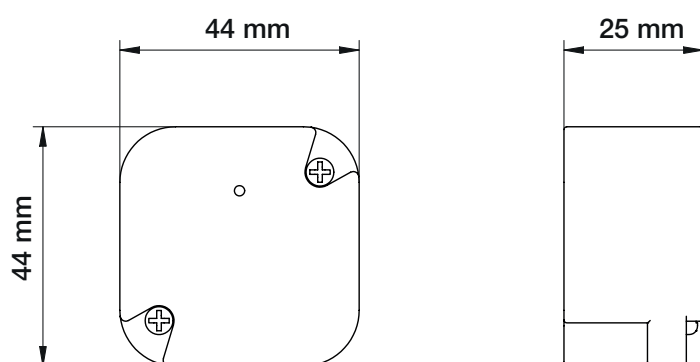

Technical data

DALI relay module.

- Standby consumption: < 1 W
- Function: relay
- Detector output: DALI
- Maximum MCB rating: 10 A (limited by national installation rules)
- Ambient temperature: -5 – +40 °C
- Usage: for indoor use only
- Dimensions (HxWxD): 44 x 44 x 25 mm
- Protection degree: IP20
- Impact resistance: IK02
- Marking: CE
- Certification marks: SundaHus, Byggsvarubedömningen
