

# Presence detector P46MR, DALI-2, secondary - BMS, 12-13 m, for flush mounting (SnapFit), Wieland gesis® 2 m cable with 5-pol. connector, white

4 year warranty

This flat and discrete presence detector is a DALI-2 secondary and BMS detector that extends the detection range of a DALI-2 master detector or can be part of a DALI-2 BMS system. If the detector is used as a secondary detector and connected to a the DALI-2 bus controlled by a DALI-2 master detector, it will start communicating with this master detector without further commissioning. If it is connected to the DALI bus of a BMS system, the detector needs to be commissioned with the BMS software. The detector settings can be modified using the Niko detector tool app and 2-way Bluetooth® communication. The SnapFit mounting system guarantees fast and stable installation. The detector is prewired with a 2 m cable and a 5-pole female connector that is unique, which helps to avoid installation errors and save time. This P46 detector with one cable is suitable for all DALI-2 installations. It can be used to extend the detection range for DALI-2 P47 or P48 master detectors or in combination with a DALI-2 BMS system.

- Flat and discrete design
- Easy installation thanks to the direct connection to the DALI bus
- Communication with the master or BMS system via the DALI bus
- Power supply via the DALI bus
- SnapFit mounting bracket for easy and stable mounting in all types of suspended ceilings with or without removable tiles
- Quick cabling using screwless and easily accessible plug-in terminals
- Screwless strain relief and screwless installation of cable cover
- User-friendly app for settings (iOS/Android) or BMS software
- 2-way Bluetooth® communication ensures quick modification of settings and live feedback in the app
- Pre-configured functions:
  - adjustable PIR sensitivity (4 levels)
  - event log keeps track of recent changes
- Settings and configuration can be locked with a PIN-code
