Niko Intense sterling coated

Niko switches and sockets

Belgian quality, pure design

Innovation, design and ease of use. These are the cornerstones for Niko's product development. **Intelligent solutions** increase your **comfort** and **ease of use**. So you know within seconds which button commands which device. The sleek shapes and refined details of our switching material are your perfect partners in making a **design statement**. Besides, you can't beat **Belgian quality**.

Timeless and sustainable

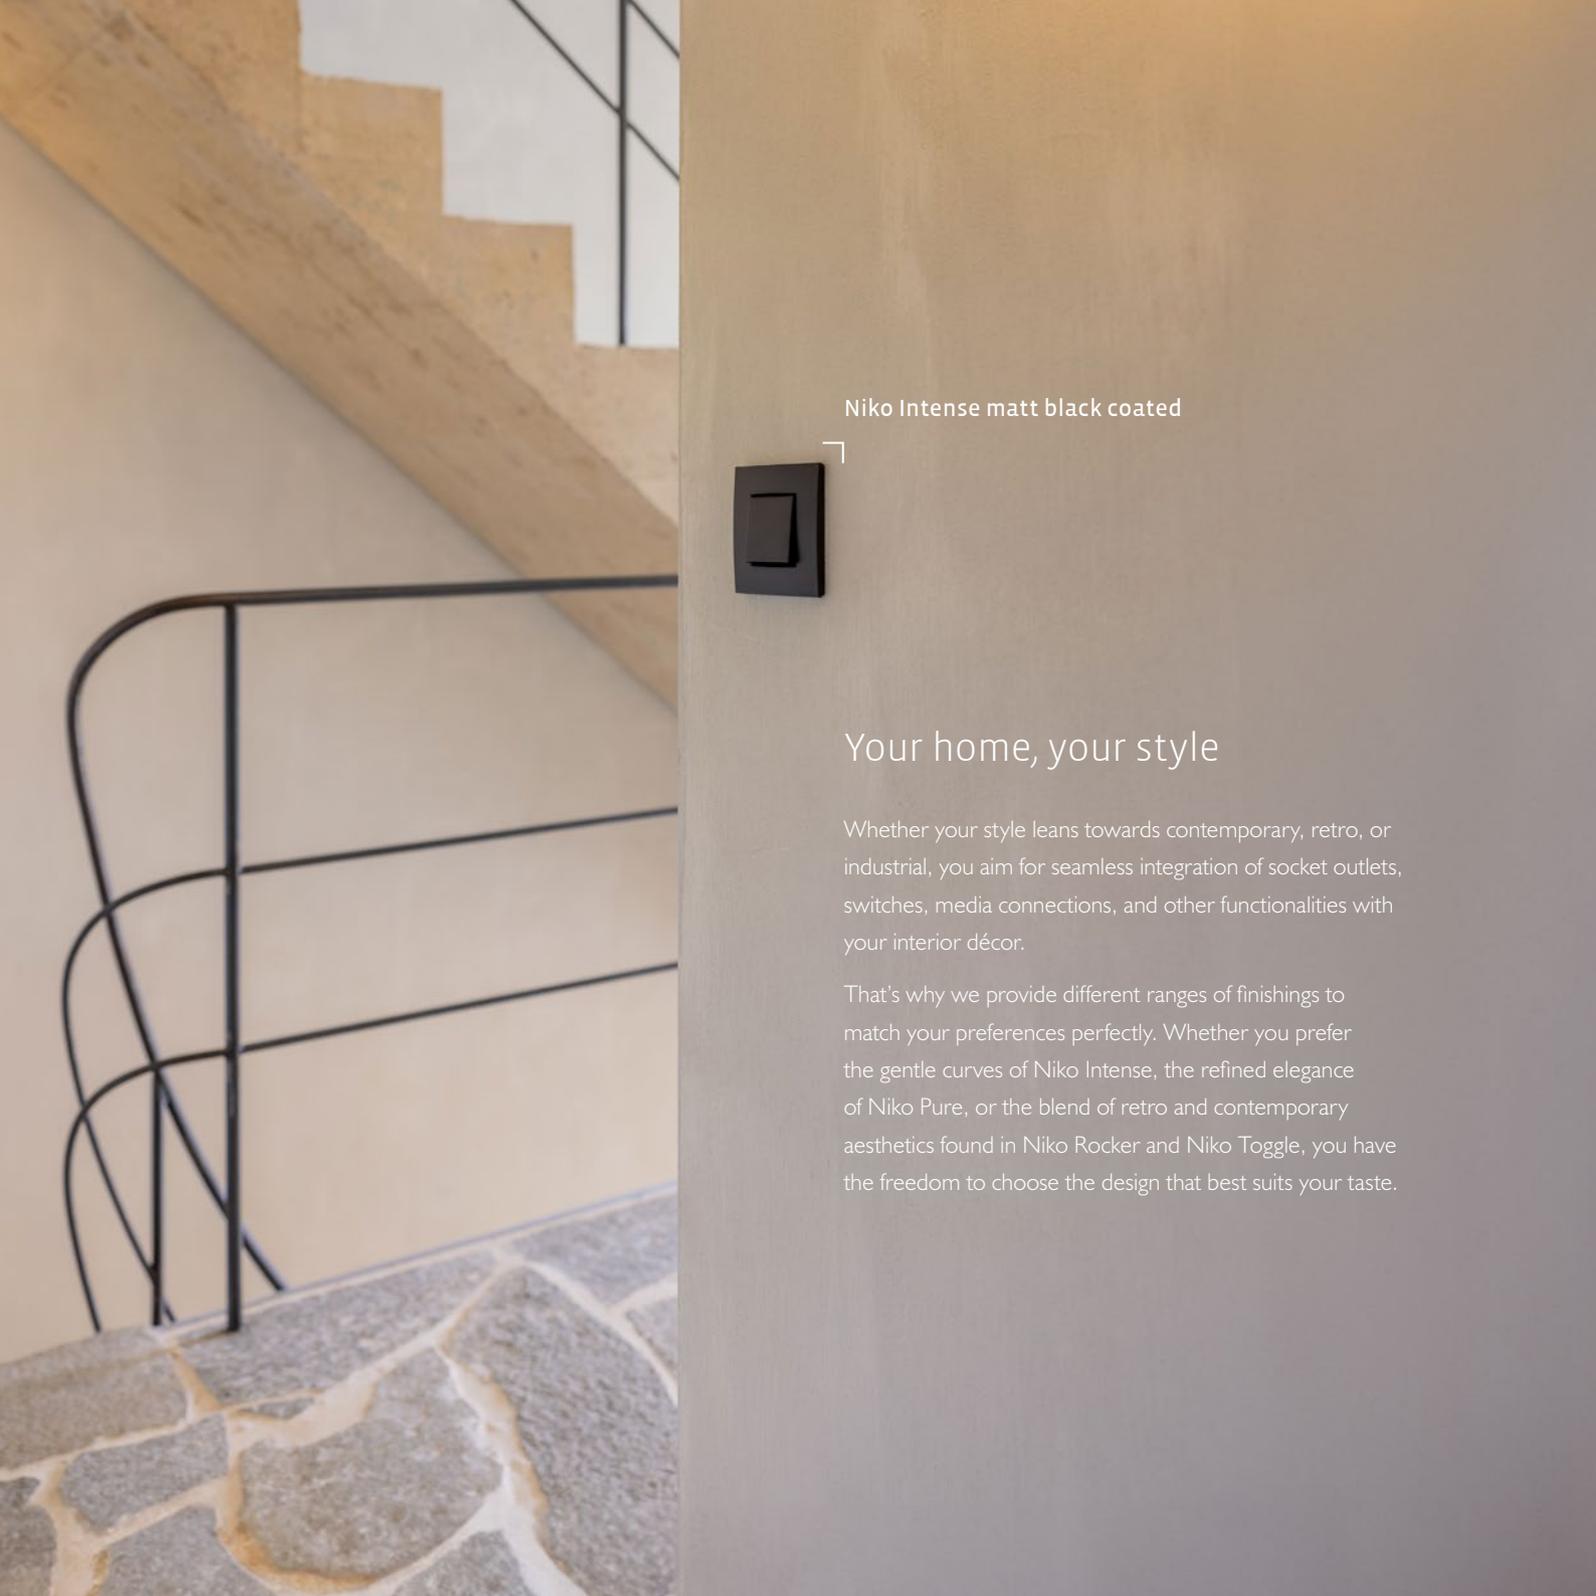

The Niko finishings give you a **timeless design**, produced in **durable materials**. You choose the range that best matches your style. Planning to update your switches after a few years? Thanks to the universal flush-mounting mechanism used for the Niko Original, Niko Intense and Niko Pure ranges, it's a simple task: just replace the faceplates and the finishing sets with new finishings and colours. Interested in upgrading your interior to our premium Niko Rocker and Niko Toggle range? In that case, you'll need to replace the mechanism as well.

Make your choice

It's all up to you, down to the smallest detail. Your choices result in perfectly matching socket outlets, switches, dimmers and media connections. Do you prefer one finishing for your entire home? Or would you rather alternate by room? It's up to you!

4-year warranty

The legal warranty period for switching material is two years. But with Niko, you opt for the best quality. Every product we make is thoroughly inspected at every step in the production process. That is why we offer you a 4-year warranty. On all our products.

Niko Intense matt black coated

Your home, your style

Whether your style leans towards contemporary, retro, or industrial, you aim for seamless integration of socket outlets, switches, media connections, and other functionalities with your interior décor.

That's why we provide different ranges of finishings to match your preferences perfectly. Whether you prefer the gentle curves of Niko Intense, the refined elegance of Niko Pure, or the blend of retro and contemporary aesthetics found in Niko Rocker and Niko Toggle, you have the freedom to choose the design that best suits your taste.

Niko Intense is a range that exudes intensity. With its soft shapes and the gentle colour palette, you are choosing a distinctly warm character. The straight-lined contours combined with the subtly curved front perfectly complement a contemporary interior with warm accents.

For every contemporary interior

With the subtle details of Niko Intense, you can give any interior a stylish upgrade. Whether you opt for the timeless white finishing that seamlessly blends into the wall or dare to play with a bold black or grey accent, Niko Intense always manages to create the perfect atmosphere.

Niko Pure steel champagne coated

Niko Pure

A range of finishings for those who love an ultra-sleek design in timeless materials. Made from special, authentic materials such as bamboo, stainless steel, Bakelite® and aluminium, an elegant and sustainable finish is guaranteed. Affordable top design.

A comeback for authentic materials such as aluminium and steel is blowing some fresh air through the interior world. This makes it the ideal time to delve into distinctive switches to make your home more authentic.

Niko Pure steel white coated

Niko Pure coated steel finishings

In your search for a switch, the **Niko Pure steel coated finishings** are the ideal answer if you want to bring sleek and solid together.

Steel is the embodiment of quality

The high-quality finishing of the 2 mm front plate in coated steel, along with the resulting substantial feel of these designs, serves as a testament to that. The Niko Pure steel coated finishings will add a touch of sophistication and durability to any room.

Niko Pure alu black brushed

Niko Pure alu brushed finishings

In the **Niko Pure alu brushed finishings**, you'll find refined luxury at its best. Our brushed aluminium shines in all its elegance in a wide range of interior styles.

The sustainable nature of aluminium

The power of aluminium lies in the fact that it is a strong, but light material. This contrast is what animates the Niko Pure alu brushed finishings in all their modest luxury. The sustainable nature of this material, with a front plate of 6 mm in aluminium, makes these designs authentic showpieces.

Niko Pure bamboo

The Niko Pure bamboo finishing offers a refined combination of modern elegance and sustainability. The light but sturdy faceplate with its natural wood pattern perfectly complements natural tones and materials in your home. Combined with a stylish finishing set in anthracite, a sleek and modern contrast is created.

Bamboo is known for its rapid growth cycle and minimal ecological impact, making it an extremely sustainable choice. Thanks to bamboo's ecological advantages - for instance, it can absorb large amounts of CO₂ and requires very little water, pesticides, or fertilisers - this faceplate contributes significantly to sustainability. This blend of natural elements and contemporary design makes our bamboo faceplates ideal for those looking for a sustainable solution without compromising on quality or style.

NikoPure Bakelite® piano black

A sleek design and a nod to nostalgia. Thanks to the vintage feel of Bakelite, this finishing is a perfect fit for modern interiors with retro or vintage touches.

Our Bakelite faceplate brings the nostalgic charm of yesteryear back into your interior. The material exudes a subtle shine that highlights the traditional design, and is popular thanks to its timeless look. Bakelite not only adds a touch of vintage to stylish, simple rooms, but can also offer a surprising contrast in modern interiors.

Whether you choose a retro design or a contemporary interior with character, our Bakelite finishing offers the perfect balance between nostalgia and modern finesse.

Niko Rocker and Niko Toggle

Defined by their minimalist design and premium finishing in aluminium and steel, Niko Rocker and Niko Toggle embody refined design and tactile interaction. Niko Rocker pays homage to an innovative rocker switch design from 1958, while Niko Toggle draws inspiration from one of Niko's inaugural Bakelite® toggle switches introduced in 1928. Handcrafted in Belgium and made using today's technology and materials, Both celebrate authentic, vintage design, with a contemporary twist.

Niko Rocker steel champagne coated

Niko Rocker steel white coated

Niko Rocker

The Niko Rocker distinguishes itself with its sturdy metal build, which makes a clear and satisfying 'click' when turned on and off. The long shape and subtly finished edges of the switch button form a harmonious whole with the monolithic faceplate.

Niko Toggle alu gold brushed

Niko Toggle

Niko Toggle works just like a little joystick, which you operate up or down with a small movement. The design is characterised by a subtle notch at the top of the toggle bar, a mildly brushed texture and a robust shape.

Niko Rocker alu blue grey brushed

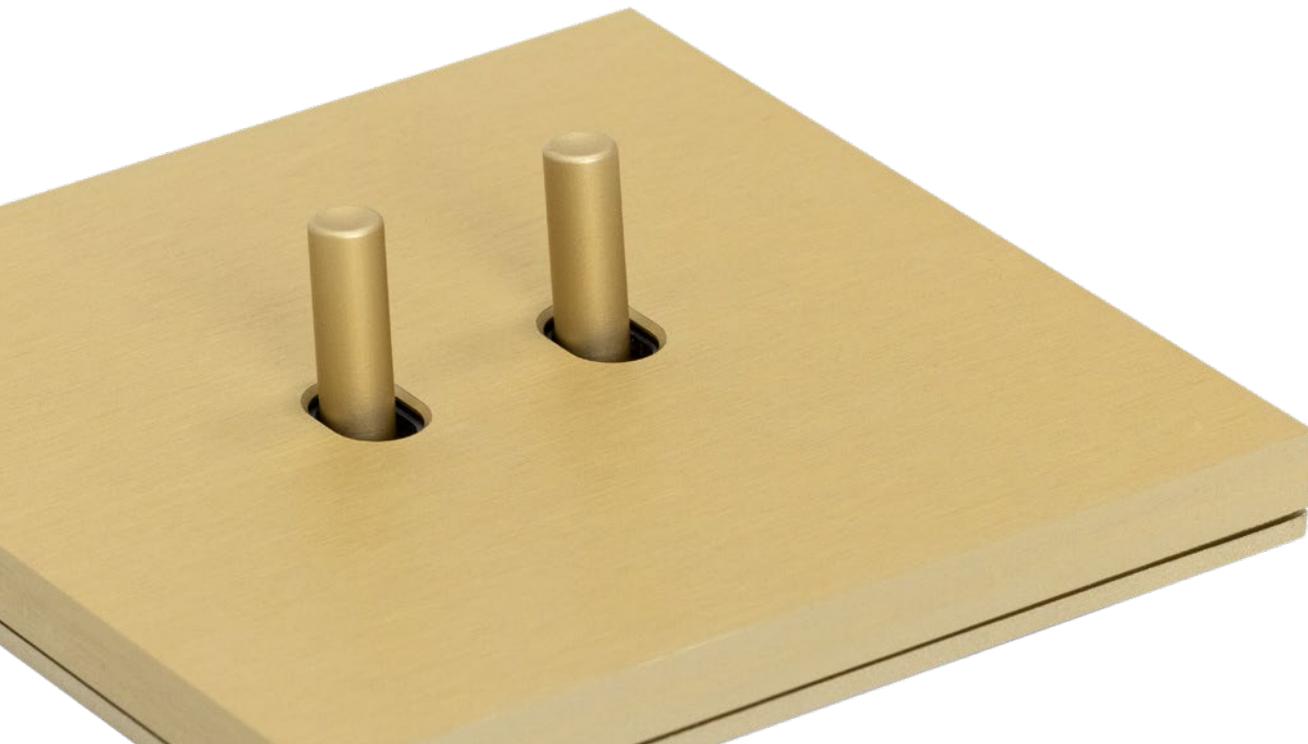

Hidden until lit

Both the Niko Rocker and Niko Toggle have an optional hidden-until-lit LED, that functions as a status feedback. Indicating that the switch is on or off, a soft warm glow surrounds the toggle or elegantly fades towards the top of the rocker. A well-considered feature that adds to the overall design experience.

High-quality mechanism

The high-quality core shared by Niko Rocker and Niko Toggle has been specifically developed for these two switches. It is built upon Niko's proven switch technology, but varies slightly, as the mechanism for these products is moved 8 mm further back in relation to the metal frame.

Niko Toggle alu black brushed

Socket outlet for Niko Rocker and Niko Toggle

Niko Rocker and Niko Toggle switches can be combined with a socket outlet in the same high-quality finishing, to complete the premium look.

The understated faceplate design contours the electrical mechanism for an uncluttered aesthetic. With the use of black screws and shutters in the darker finishings, we've given each socket a more cohesive look.

Behind each sleek faceplate, you'll find the same high-quality electrical mechanism we use in all of our Niko socket outlets. Quick and easy to install. Proven, durable and reliable.

Niko Pure steel white coated

Niko Pure steel black coated

A complete product range

No matter what you are looking for, you will find the right solutions in our portfolio. Combine devices such as switches, USB chargers and dimmers in the finishing of your choice.

Niko designs electr(on)ic solutions to enhance buildings to better suit the needs of the people who live and work in them. By using less energy, by improving light comfort and safety and by making sure all applications work together seamlessly. Buildings with Niko are more efficient, are controllable from a distance and interact within bigger ecosystems. Niko is a Belgian family business from Sint-Niklaas with 700 employees and 10 European branches.

At Niko, there is one question that keeps us busy every day: “How can we enhance buildings to better suit your needs?”
