

Presence detector P46MR, DALI-2, secondary - BMS, 12-13 m, for flush mounting (SnapFit), white

353-651021

4 year warranty

This flat and discrete presence detector is a DALI-2 secondary and BMS detector that extends the detection range of a DALI master detector or can be part of a BMS system. The SnapFit mounting bracket ensures a quick and stable mounting in all types of suspended ceilings with or without removable tiles. If the detector is used as a secondary detector and connected to a DALI bus controlled by a DALI master detector, it will start communicating with this master detector without further commissioning. If it is connected to the DALI bus of a BMS system, the detector needs to be commissioned with the BMS software. The detector's settings can be modified using the Niko detector tool app and 2-way Bluetooth® communication between a smartphone and the detector or using the BMS software.

Finishing colour: white
