

Wireless 2-channel receiver for switching

410-00351

4 year warranty

This 2-channel receiver for DIN-rail mounting is controlled wirelessly via radio frequency. It has two potential-free contacts and a connection for an external antenna (410-00359). Each switch output can have 32 transmission codes linked to it. The receiver can be controlled in on/off, pulse and push button modes. The on/off mode also has two timer functions and a logic function.

Technical data

Wireless 2-channel receiver for switching

- Not compatible with the wireless bridge, nor with the wireless smart hub
- Input voltage: 230 Vac \pm 10 %, 50 Hz
- Maximum MCB rating: 16 A (limited by national installation rules)
- Communication protocol: Easywave
- Operating frequency: 0.8683 GHz
- Ambient temperature: -20 – +45 °C
- Protection degree: IP20
- Weight: 108 g
- Dimensions (HxWxD): 89.6 x 34.5 x 62.8 mm
- Marking: CE
